

## Objective

To demonstrate how to create a new Skype user on a Windows based computer.

## Instructions

1. Open Skype.
2. Click on "Don't have a Skype name".
3. Fill in your name in the first box.
4. Create a Skype name in the second box.
5. Create a password (include at least 1 number).
6. Type the same password.
7. Check the little box at the bottom after reviewing the License Agreement.
8. Click the "Next" button.
9. Enter your e-mail address.
10. Select the country you live in.
11. Click "Sign In".
12. Your account has been created!
