

PC: Recieve a Call

SKYPE
aligning technology with the learning model

BYU
IDAHO

Objective

To demonstrate how to recieve a phone call in Skype on a Windows based computer.

Instructions

1. When someone calls you on Skype, a window appears.
2. Select either the green answer button or the answer with video button to talk.
3. Select the red ignore button to not answer.
4. If you answered, begin speaking when the call window appears. If microphone and camera are set up, you will be able to have live video chat with audio with the person on the other end.
